

I just published your EXAM1 grades. They are not great.

*A peek into the life of a math major at UNC*

Hello,

The test grades are up. The grades were generally terrible. (Median 38, Max 105=100%). I would say > 50 pts is "OK", and less than 50 is not good.

I don't know what I'm going to do, but I may to try to think of some way to "get rid" of this score for those who did really poorly, then put a greater emphasis on continuity on the final. (More on this later
